Warm/cool alternation. Grey #3D3D3D for gridlines and "Other" pie slices only, never as a data series.

DO'S AND DON'TS

Do

- Use Grift for presentations and graphics
- Use Outfit for documents, reports, and web
- Use corrected hex codes (Amber #F7B041, Blue #0B86D1)
- Dark backgrounds for all brand assets
- Use brand templates (Dark PPTX or Colorful PPTX)
- Follow chart series order S1 through S12
- Grey for gridlines and axes only
- Tag content correctly in Buffer
- "Datacenter" one word, "Nvidia" not NVIDIA
- Export test PDF and eyedrop confirm colors

Don't

- Use old amber #E8A830 or blue #1A84C6
- Use Calibri, Arial, PT Sans, or system defaults
- Place logos on white or light backgrounds
- Freelance the brand. Follow the system.
- Use generic stock photo aesthetics
- Skip chart series (don't jump from S4 to S9)
- Use Grey #3D3D3D as a chart data series
- Stretch, rotate, or recolor the logo
- Reference "SemiAnalysis gold" (it's SA Amber now)
- Mix SA Core and SA Spectrum in one chart
